

Weather Source API Suite

Weather data engineered for decisions

Powered by the OnPoint® platform, our enterprise-grade APIs deliver fast, precise global weather data needed to operate with confidence. Optimize regional inventory, enhance user engagement in consumer-facing applications or improve logistics with ease.

Why us?

99.999% uptime

Always available

Always accurate

- **Trusted consistency:** Uniform grids with advanced quality control and real-time error corrections ensure gap-free, homogeneous data ready for immediate analysis.
- **Unrivaed global coverage:** High-resolution, spatially complete coverage for all landmasses and up to 200 miles offshore to cover your multilocation operations.
- **Developer-centric:** RESTful interface and Metric, Imperial, and SI units for seamless integration.

Comprehensive API plans

Free

Testing & prototyping

\$0 / year

Daily credits: 1,000
Core Models: NOAA-GFS
History Depth: 24 hours

Products

- ✓ GFS Forecast
- ✓ NOAA Historical Weather

Add-ons

Lightning Data, Pollen Forecast,
WxContext

Starter

App dev & small biz

\$3,600 / year

Daily credits: 5,000
Core Models: NOAA-GFS, NOAA-HRRR,
PWS
History Depth: 1 year

Products

- Everything in Free +**
- ✓ High-res rapid refresh (HRRR)
 - ✓ Nowcast
 - ✓ Weather for apps
 - ✓ Astronomy
 - ✓ UV Forecast
 - ✓ NWS Alerts
 - ✓ Location

Add-ons

Lightning Data, Pollen Forecast,
WxContext

Professional

Commercial scaling

\$9,000 / year

Daily credits: 150,000
Core Models: NOAA-GFS, NOAA-HRRR,
